Unlesse great winds and flouds alter the same.

To find out the time of full sea in any of these places, adde the houres and minutes right against any of them placed to the time of full sea at London bridge, which is noted in the 5. collume of the Almanacke, and you have your desire.

Example.

I would know the time of full sea at Gravesend the 4. day of January, 1642. The time of full sea at London being at 1. a clocke, & 24. minuts, unto which adde 10. and 30. minutes, the number found against Gravesend and it makes 11. a clock, & 54 minutes, the time of full sea at Gravesend on the day required: These houres are alwaies accompted from 12. at noon: what exceeds 12 must be accompted for next day. And so for any other places.

The uſe and explanation of this Table.

It is calculated for 30. yeares: the firſt columne whereof towards the left hand ſheweth the yeares of a Leaſe, and right againſt each yeare on the right hand is the number of the yeares, quarters, and half quarters of yeares purchaſe that ſuch a Leaſe is worth.

Example:

Suppoſe there be a Leaſe to be ſold to endure for 13. yeares to come and you would know how many yeares purchaſe it is worth.

Looke in the table under the titles of yeares of a Leaſe for 13. and right againſt it on the right hand you ſhall find 7. years 3. quarters, and a halfe quarter of a yeares purchaſe, the value of ſuch a Leaſe within an eighth part of a yeares rent; which is the neereſt value that I have calculated this table unto, in regard of the omiſſion of many fractions that would ariſe.
